Technical Specifications

GENERAL

Motion Pacific Dance Studio was designed specifically to transform into a performance space ideal for presenting dance in an intimate setting. When set for performance, Motion Pacific seats 60-100 people in raked seating.

STAGE

- The performance space is 20' deep by 39' wide with no wings.
- The floor is a grey Marley surface on a sprung wood dance floor.
- On the stage right side of the stage there is a staircase leading to the upstairs studio.
- There is an upstage wing on Stage Right underneath the stairs.
- There are 2 doors upstage left. The far upstage door leads to the electrical closet and then to outdoors. Just downstage of that there is a door leading to the lobby. There is also a door to the lobby down stage left in the house.
- The upstairs studio can be accessed from the lobby as well as from the stairs stage right.
- There is no main curtain, no wings, no borders.
- Freestanding flats are available if needed.
- There is a black curtain upstage covering studio mirrors.
- There is no crossover.

ACCESS

The studio is accessed by standard sized doors, 30 feet from the parking lot. There is no loading dock.

RIGGING

- Overhead rigging is very limited. Motion Pacific has very high ceilings that are not accessibly by ladder or lift.
- There is a single wench driven lineset at 9' downstage of the back wall. The batton is off center and spans from 4' on from the SL wall to 14' on from the SR wall. The batton reaches 4' above the deck to 20' above the deck.

LIGHTING

[Control – NSI Mélange](#)

Dimming - 34 total dimmers

- 12 NSI Multiplex dimmers (1000w per dimmer, 20 amp per 4) located up stage left
- 8 NSI Multiplex dimmers (1000w per dimmer, 20 amp per 4) located up stage right
- 6 Leprechaun Multiplex Dimmers (20amp per 3) located upstage center
- 4 DMX Dimmers (600w per each) located FOH
- 4 DMX Dimmers (600w per each) Located FOH
